

# ROTRONICS

## BATTERY MANAGEMENT SOLUTIONS

Battery Management Programmes  
keeping your vehicles and Customers  
on the move

# Training Process

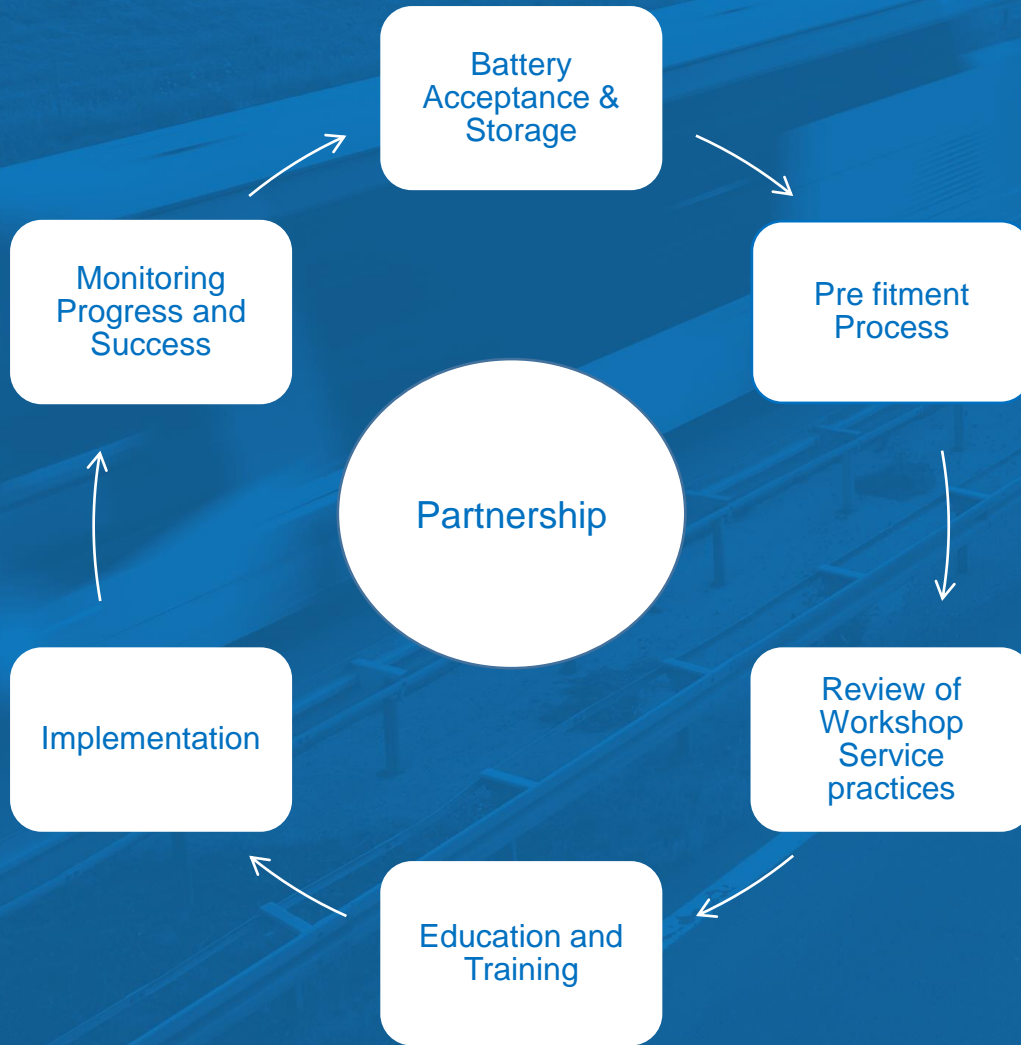

Our Training programmes are created and designed around your workshop needs and requirements

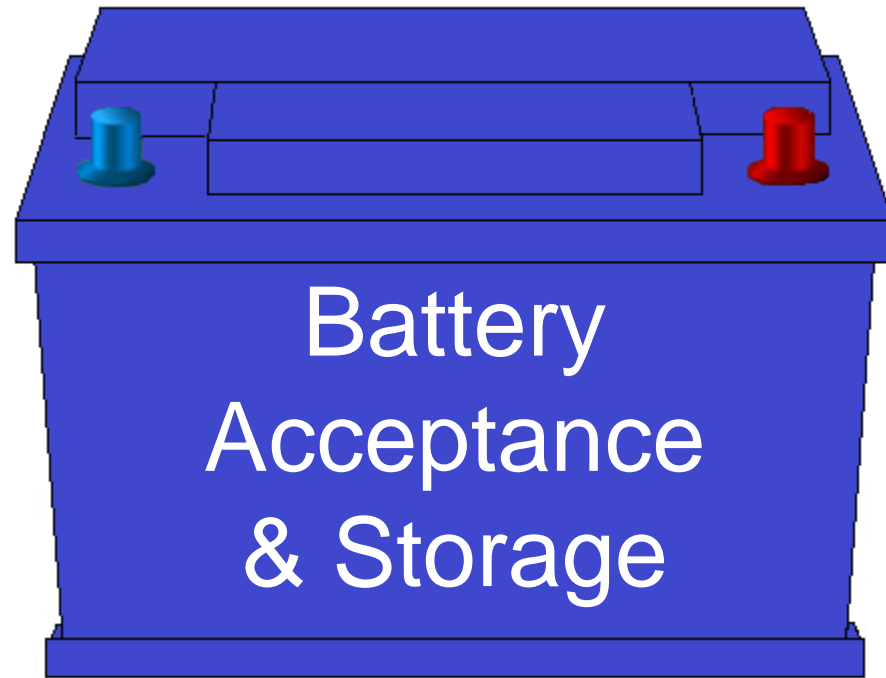

# Training Process

We work closely with our customers in creating Best Practices, that work in your environment, across all aspects of battery care and maintenance from start to finish

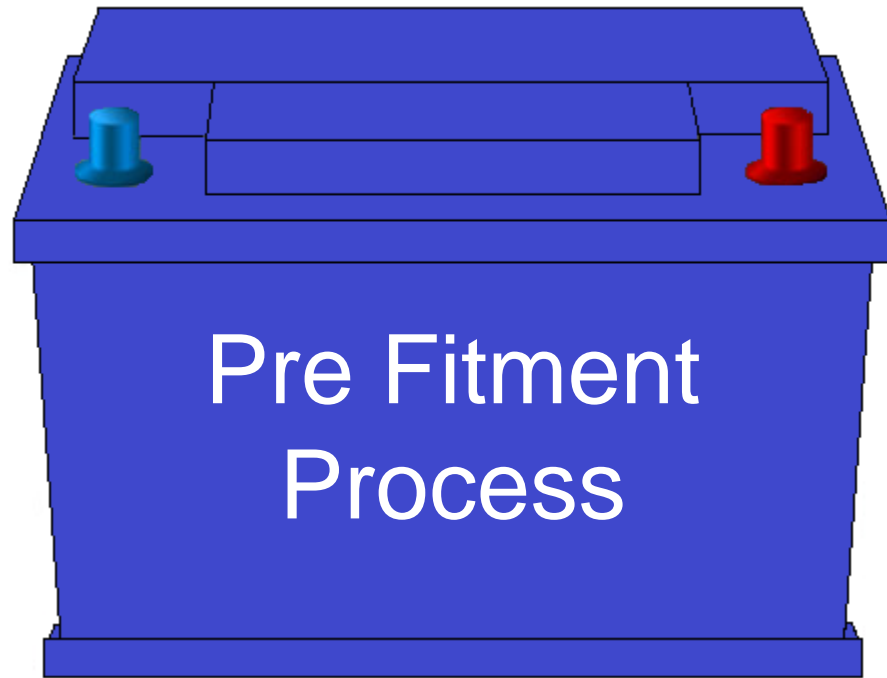

Validating & measuring the quality and condition of batteries purchased and how they are maintained before use

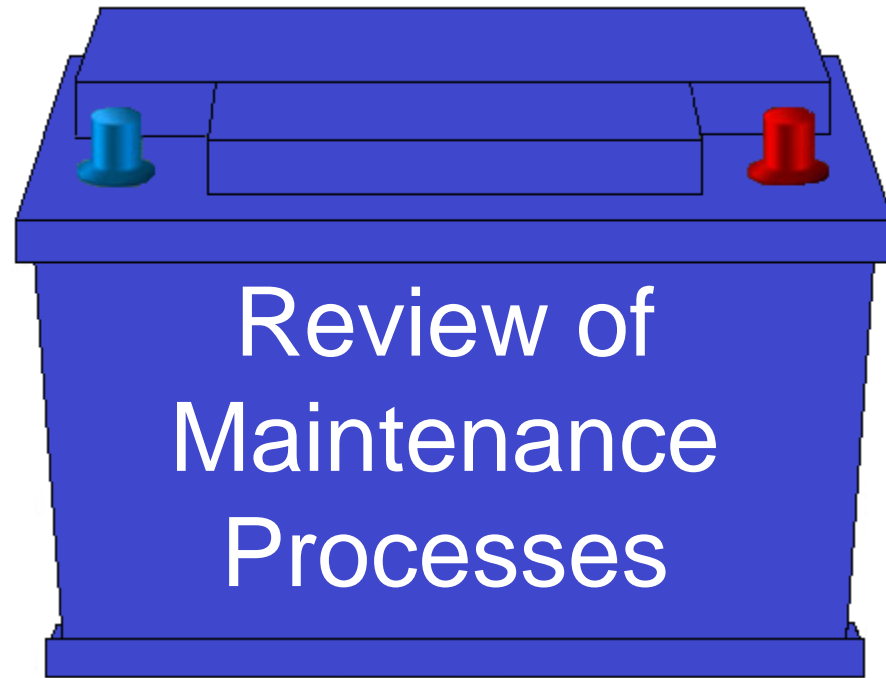

Ensuring Batteries are fully charged and “in Balance” (24v sets) and are in a good and healthy condition before fitment

Creating Best Practices  
that work alongside and  
compliment existing  
workshop processes,  
maximising efficiencies and  
service opportunities

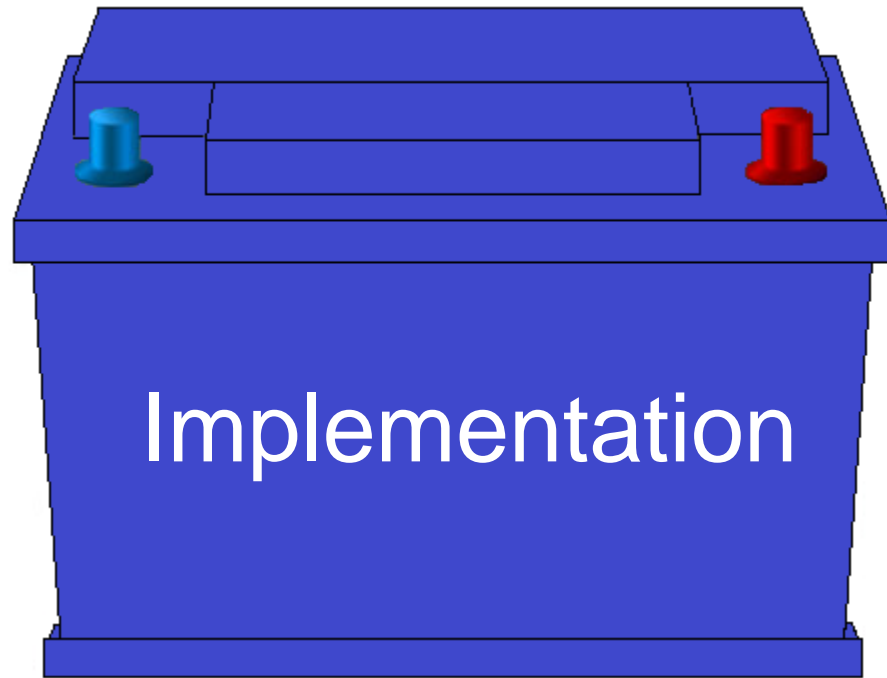

Delivering on site training  
engaging with staff, sharing  
knowledge and expertise  
on how to get the most out  
of the programmes

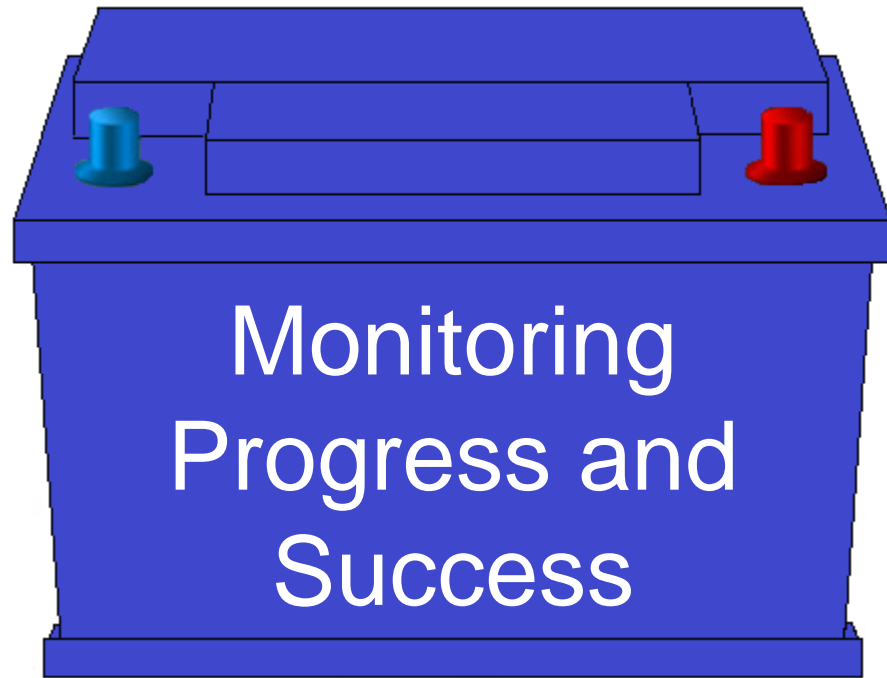

Launching the programme  
ensuring everyone knows  
their responsibility and role  
they play in supporting the  
process

Working in partnership with you,  
collectively reviewing progress  
and offering tips and advice on  
ensuring the business achieves  
maximum return on investment
