

CTEK CS ONE

Simple & Powerful Charging

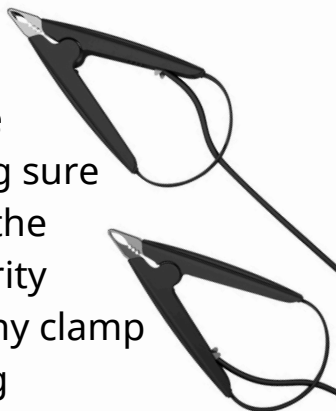

Part No: 15000503

Charging 12V batteries couldn't be simpler!
Simply connect CS ONE to your battery and let
it do the work for you!

Polarity Free Clamps

Connecting your charger cannot be easier! Gone are the days of making sure you have connected the clamps to the correct battery pole. CS ONE's polarity free clamps allow you to connect any clamp to any pole of the battery. Reducing connection time and removing potential errors and damage if the clamps are connected wrong.

Automatic Adaptive Charging

CS ONE does all the thinking for you. No setting modes or selecting battery type, fitted with CTEK's revolutionary APTO adaptive charging technology, CS ONE can automatically recognise what battery you have connected. It will then deliver a customised charging programme to efficiently charge the battery and increase battery health and longevity.

Quick Overview

- ✓ Polarity Free Clamps
- ✓ Adaptive Charging Technology
- ✓ Lithium Compatible
- ✓ Charge Indicators
- ✓ CTEK App Compatible
- ✓ Small & Lightweight
- ✓ Detachable Cables

See Charge Progress

Easily see charge progress with the built in LED charge progress indicator. The segments indicate how long charging will take, from 8 hours+ remaining to under 1 hour.

CTEK App

Download the CTEK app and connect your charger to fully control your charger. Once downloaded, you are able to see charging information such as, charge time remaining, charging voltage, current and much more. Once charging has completed the app can send your phone a notification. You can also adjust the charge indicator brightness on CS ONE from the app.

Lithium Compatible

Charge all Lead-Acid batteries including WET, AGM, EFB and GEL. CS ONE can also automatically charge Lithium batteries without the need to change modes, like other chargers.

Extra Features

Once you have connected your CS ONE to the CTEK app you will also unlock a host of extra battery maintenance features.

RECOND

Recond mode allows you to revive deeply discharged wet Lead-Acid batteries.

SUPPLY

If you require a constant supply of power, place CS ONE into supply mode for an 8A supply.

Polarity Free Clamps

Advanced Error Detection

LED Charge Indicator

RECOND Mode

CTEK App Compatible

Automatic Adaptive Charging

SUPPLY Mode

Lithium Compatible

Wall Mountable

IP65 Protection

Supported 12V Batteries

Lead-Acid, AGM, GEL, EFB & LiFeP04

Safety Features

Spark free, reverse polarity and volt surge protected

Cables

2 metre cables with Polarity Free Clamps

Temperature

Built in Charge Compensation

Warranty

2 Years Manufacturer Warranty

Durable Design

IP65 protection from splashes and dust

Specifications

| | |
|--------------------------------|--|
| Supported Battery Types | Flooded Lead-Acid, AGM, EFB, GEL & Lithium |
| Power Output | 8A |
| Safety Features | Temperature Compensation |
| Power Supply Mode | 8A via CTEK App |
| Wireless | Bluetooth Compatible |
| Cables | 2 Metre Detachable |
| User Input | Hands Off - Fully Automatic |
| Protection | IP65 |
