

# CTEK MXS 10

10A Smart Charging

Part No: 15000527

Powerful 10A charging, fitted with CTEK's innovative smart charging features makes MXS 10 a perfect choice for workshop and showroom 12V battery charging and maintenance

## Advanced Smart Charging

Fitted with CTEK's advanced 8 Step Smart charging, MXS 10 will automatically de-sulphate, charge and maintain your 12V battery without any intervention required. MXS 10 can also detect and alert you to any issues there may be with the battery, including: inability to be charge, hold charge and let you know if the battery is sulphated.

## Simple to Operate

No complex menus to navigate or settings to adjust, simply connect MXS 10 to a 12V battery set the correct mode using the mode button and let the charger handle the rest! MXS 10 detects battery health and will charge the battery as efficiently and safely as possible.

## Quick Overview

- ✓ CTEK 8 Step Smart Charging
- ✓ 10A Supply Mode
- ✓ CTEK CONNECT Compatible
- ✓ RECOND Mode
- ✓ Simple to Operate
- ✓ Temperature Sensor
- ✓ Reverse Polarity Protected

## Showroom Use

Maintaining showroom vehicle batteries can be challenging as 12V batteries require a lot of support and you don't want the vehicles bonnet open and ugly chargers attached. MXS 10's cables are detachable from the charger allowing you to easily feed the cables through the vehicles engine bay and ensure the charger is out of sight of customers.

## Built with Safety in Mind

MXS 10 isn't your standard battery charger. Fitted with a host of safety features, such as reverse polarity protection, short circuit protection and more you can rest easy knowing your battery is in safe hands.

Temperature Sensor

Simple Mode Selection

10A SUPPLY Mode

IP65 Splash & Dust Proof

Small Form Factor

### Supported 12V Batteries

Lead-Acid, AGM, GEL

### Safety Features

Reverse Polarity and Short Circuit Protection

### Cables

Comes with Clamps and Eyelets

### Temperature Sensor

For optimised charging routines

## Workshop Use

Charge and Maintain 12V batteries with ease. To charge simply connect the charger and the battery will be de-sulphated and efficiently charged.

For more complex updating or diagnostic work, place MXS 10 into SUPPLY mode for a constant supply of 10A, 12V power.

## Adaptable Charging

Require a specific solution? MXS 10 is compatible with CTEK's CONNECT accessory range. This includes cigarette plugs, eyelet connections, cable extensions and more. You can also opt for the indicator range to instantly see battery charge levels.
