

# Noco Boost GB70

Portable Jump Starter

Portable Lithium-Ion 12V battery jump starter that can deliver up to 2000A for jump starting dead batteries in a matter of seconds. Approved by JLR for use on JLR vehicles.

## Easily Start Dead Batteries

Designed to effortlessly bring dead 12V batteries back to life. The GB70 can deliver up to 2000A to the battery, enabling it to jump start vehicles in seconds. There's no complex menu's to navigate or settings to select, simply connect the clamps to the battery and hold the boost button.

## Suitable for JLR Vehicles

Approved for use within JLR Retailers, Noco Boost GB70 can support JLR's full vehicle range with the capability to support up to...

- 8.0L petrol engines
- 6.0L diesel engines

## Key Features

Part No: 15000573

Small Form Factor

LED Charge Status Indicator

2000A Peak

40x Jump Starts on a Single Charge

High Capacity Internal Battery

Approved for use by JLR Retailers

## High Capacity Battery

Noco GB70 is fitted with a 56 Watt-Hour Lithium-Ion battery. This not only allows it to provide up to 2000A of power to the 12V battery, but can also provide up to 40 jump starts before requiring a recharge.

## LED Indicators

Integrated Charge LED's shows the user the charge level of the attached battery and the error lamp can alert you to any possible issues with the battery or jump starting procedure.

## Safety

To prevent damage and possible injury, GB70 is fitted with a range of safety features. This includes Reverse Polarity Protection in case the clamps are attached incorrectly and the unit is spark proof.

## Small Form Factor

Designed to be taken with you, Noco GB70 weighs only 4 lbs and is 22cm in length, allowing you either stash the unit in regularly used vehicles or instantly deploy it for use.
