

A large, grey and black Projecta Intelli-Start portable jump starter is shown in the background, connected to a vehicle's battery with red and black cables. In the foreground, a smaller, black and grey Projecta Intelli-Start portable jump starter is shown, also connected to a vehicle's battery. The background is a green gradient with a pattern of leaves.

Projecta Intelli-Start

Portable Jump Starter

A highly powerful and extremely compact jump starter capable of starting 12V vehicles up to 8.0L Petrol and 7.0L Diesel. Approved and recommended solution for JLR Retailers.

Simple & Powerful Jump Starting

Effortlessly jump start JLR vehicles without needing to transport heavy, slow and outdated jump starting equipment. When connected to a 12V battery, Intelli-Start will automatically detect the battery's voltage and alert you when the unit is ready. Press one button and the unit will provide the battery with 750A.

Small Footprint

Designed to be taken to vehicles in or out of the workshop. Intelli-Start only weighs 2.6KG and has an ergonomic carry handle for easy transportation. When not in use the cables neatly store around the handle of the unit and the clamps attach to the side. Supplied with a protective carry case.

Key Features

Part No: 15000572

- ✓ Automatic Voltage Detection
- ✓ Simple to Operate
- ✓ USB C Charging
- ✓ Crisp LCD Display
- ✓ Light, Compact Design
- ✓ Recommended by JLR

Protection System

To prevent damage to the battery or harm to the operator, Intelli-Start has a fitted automatic protection system that removes the risk of surges, short circuits and overheating. The unit also prevents sparks and damage if the clamps are attached incorrectly.

Rapid Recharge

Once the vehicle has been started, leave the Intelli-Start attached to the battery for 40 seconds and it's Rapid Recharge technology will take power from the alternator to recharge the unit.

Durable Design

Designed to be used in emergency situations, the unit is fitted with a rubber moulded, impact resistant housing that can withstand accidental damage and drops. It is also IP53 dust and water protected.

Powerful Internal Battery

Fitted with Lithium LiFePO4 internal battery for maximum performance. The battery supports the rapid starting of vehicles and can support up to 2000 cycles which is four times the amount of competing products.
