Key Message	DCA 8000 - 12 V Battery Tester and Charger Mandate for CV Authorised Repairers	
Issue/Change	<p>Midtronics DCA 8000 is one of the warranty approved and latest 12 V Battery Tester and Chargers designed for quick and accurate diagnosis of 12V batteries. As discussed, and presented in the UK AWG, it is now required for all CV Authorised Repairers to have the DCA 8000 (or an equivalent quality tool meeting the same technical specifications, time to diagnose and accuracy) . CV Authorised repairers can place an order via the Rent-Try- Buy scheme with Rotronics using the contacts below or purchase from the Bosch Special Tools webstore directly. The details of Midtronics offerings are below. From 1st January, 2026 the price will be increased by Bosch by 21% for units purchased via the Special Tools webstore, owing to updated Bosch stocking processes and trading terms. All CV Authorised Repairers will be checked for compliance by the end of January and if not in receipt of a DCA 8000 (or an equivalent quality tool meeting the same technical specifications, time to diagnose and accuracy) will be auto-shipped a unit in early Feb 2026 at 2026 prices.</p> <p>Rent -Try -Buy Scheme 3 month rent £250/month with £250 deposit If ordered before 23rd Dec, the cost will be held at £4800 for DCA8000 with trolley and scanner.</p> <p>Contacts: Tim Taylor ttaylor@ford.com or Ken Clark ken.clark@rotronicsbms.com for Midtronics offer and demo.</p> <p>Also attached is the recommended procedure for 12 V Battery diagnosis.</p>
