	Special Service Tool Release Note	
Subject: Update to Brake System Bleeding Equipment	Models	All

To: **All Retailers, Authorized Repairers, National Sales Companies and Importers**

Attention: **The Managing Director/Retailer head of business/General Manager. The Service/After-Sales Director/Manager**

Dear Colleagues,

To support braking system pressure bleeding, JLR has approved new equipment, which will be added to the general equipment minimum standard at the next update.

Options listed below are designed to support different workshop requirements.

NOTE: As defined in the Minimum Standards General Equipment, it is **MANDATORY** for a retailer to have brake bleeding equipment in their workshop; solutions are being added to the list as an **option** for retailers to purchase or source locally***.

	20-litre Brake system pressure bleed equipment		
JLRP20DP – Brake System Pressure Bleed Equipment***	Option	Launch price*	List price
	Not suitable for loan tool program	€1,031.00 / £904.00	€1,134.00 / £995.00
	60-litre Brake system pressure bleed equipment		
JLRP60DP – Brake System Pressure Bleed Equipment***	Option	Launch price*	List price
	Not suitable for loan tool program	€1,580.00 / £1,386.00	€1,738.00 / £1,524.00

***NOTE:** Launch price is being offered for all orders placed from the release date up to **30th September 2026**.

This general equipment can be ordered directly from Rotronics at: <https://www.rotronicsbms.com/jlr> or directed to Rotronics through the Bosch web shop at <https://jlrequipment.service-solutions.com>

All tools are expected to be made available to order from **June 2026 and ship July 2026**.

	Pressure Brake Bleeder Unit (with built in 10-litre brake fluid reservoir) **	
JLR-ALB600 – Pressure Brake System Bleeder***	Option	List price:
	Not suitable for loan tool program	€2,003.00 / £1,734.00

NOTE: An optional trolley is available for purchase through Bosch web shop to support mobility of JLR-ALB600.

**This general equipment can be ordered direct from the Bosch web shop at <https://jlrequipment.service-solutions.com>.

All tools are expected to be made available to order from **June 2026 and ship August 2026**.

*** If the equipment is locally sourced, the following requirements must be met:

- Ability to perform pressure brake bleeding efficiently and thoroughly on JLR vehicles equipped with both Conventional brake systems and Integrated Power Brake systems.
- Should be able to generate 3-5 bar working pressure when filling, flushing, and bleeding the brake systems.
- Analog/digital pressure dials displaying real-time system pressures.
- Equipment needs to be able to work with a minimum of 10L brake fluid container.

NOTE: Previously approved units are still approved but may not be available for purchase. Please refer to TOPIx for more information on brake systems and applicability.

NOTE: Refer to the supplier for the latest prices and local currency variation.

NOTE: Shipping costs or any local taxes are not included in this price and will be added to your invoice.

NOTE: You must check the tool(s) immediately on receipt. If any discrepancies or shortages are discovered, contact your supplier within seven working days.

We appreciate your continued support and cooperation,

Yours faithfully

Mark Allonby

Head of Launch (Stand-in)
